# 1. Project Contact and Coordination Information

### Project Leaders

Eric Brown, MBA
Executive Director
California Telehealth Network
California Telehealth Network, Project Coordinator

Denise A. Jurca, MBA
Director of Operations
California Telehealth Network
California Telehealth Network, Associate Project Coordinator
Phone #: 916-341-3367
FAX #: 916-341-3378

Email: djurca@caltelehealth.org

### Responsible Administrative Official

Eric Brown, MBA
President & CEO
California Telehealth Network
California Telehealth Network, Project Coordinator

Address:

California Telehealth Network 2001 P Street Suite 100 Sacramento, CA 95811

Phone #: 310-365-1450 FAX #: 916-341-3378

Email: ebrown@caltelehealth.org

# Responsible Organization

California Telehealth Network 2001 P Street Suite 100 Sacramento, CA 95811 http://www.caltelehealth.org

#### Statewide Coordination

CTN operational management receives guidance and operational support from the large group of CTN Consortium Member organizations. The CTN Consortium was originally formed to coordinate and consolidate multiple independent Rural Health Care Pilot Program (RHCPP) proposal initiatives, with the aim of submitting a single proposal that represented the interests of the State of California. The Consortium was formed specifically at the direction of the Governor's Office. Please see the current list of CTN Consortium Board Member organizations on the CTN web site (www.caltelehealth.org/board-director). The CTN Consortium advises and informs CTN project management through the CTN Board and CTN Executive Committee, whose members represent rural health care providers, state government organizations, as well as non-profit health care funding organizations. Statewide coordination of the CTN project is greatly facilitated by the willing investment of time, resources and expertise provided by the CTN Consortium members.

# 2. Identify All Health Care Facilities Included in the Network

From the outset, CTN initiated numerous statewide communications activities aimed at enrolling prospective CTN RHCPP participants. Initially close to 1000 health care facilities signified their intention to participate by submitting a Letter of Agency with 863 of those sites confirmed eligible through the CTN Form 465 filing, dated July 3, 2009. Since that time CTN has added previously unidentified sites in supplemental 465 filings and now has a total of 970 approved participant sites. The CTN still receives calls and Letters of Agency from organizations interested in participating in the CTN. These organizations will continue to be put forth for eligibility determination and put on the CTN's list of eligible sites who want to participate in this exciting project. These sites will be held in queue for RHCPP site substitutions if existing sites either close or decline to participle. Otherwise the sites will be encouraged to enroll in the Healthcare Connect Fund (HCF).

In addition to the data on the posting shown below, CTN is including in this report, additional approved participant sites, the Census Tract, RUCA codes, public vs. non-public status, and non-profit vs. profit status associated to the filing. Please see attachment 1 of this report.

#### 3. Network Narrative

The initial request for proposals (RFP) for CTN network services (CTN RFP #2009-02) was initiated in 2009 and provided detailed specifications and requirements for performance, reliability, security and quality of services, as well as detailed requirements for managed services to be provided by the Contractor(s).

### Form 466A Filing Status

In October, 2012 CTN completed a detailed technical analysis to consider implementation of a new, expanded Network Based Firewall (NBFW), as well as additional upgrades and

adjustments to the original network infrastructure. Since the last report, CTN renewed its agreement with CENIC to continue providing peering point services for CTN's network architecture. Due to a much more desirable price offering from CENIC, CTN chose not to move forward with the NBFW. CTN continues to work with CENIC and AT&T to make the necessary adjustments to the core network circuit at the CENIC co-location in Los Angeles as warranted by CTN network traffic demand. CTN anticipates upgrading the CENIC connection from 100 Mbps to 300 Mbps in the next six months.

#### 4. List of Connected Health Care Providers

As of August 31, 2013 a total of 234 sites are connected to the CTN backbone with CTN RHCPP routers at each location. In additional 532 locations have access to the CTN network through interconnections with sub networks such as CENIC, which provides connectivity to all academic medical centers in California, Indian Health Services, the California Rural Indian Health Board, the San Francisco Community Clinic Consortium and Open Door Community Health Centers, Taking these sites into account, a total of 766 sites have access to CTN as of August 31, 2013. Please see Attachment 2 for a list of the physically connected sites and the University of California sites that originally signed LOAs.

### 5. Identify the Following Non-recurring and Recurring Costs

CTN started invoicing for AT&T services in June, 2013 for months May 2011 – November 2011. CTN has submitted six (6) invoices for a total amount of \$284,110; \$250 of this total is non-recurring costs.

#### 6. Describe how Costs have been Apportioned and the Sources of the Funds to Pay Them

Due to an expanding appetite from CTN sites for higher capacity broadband circuits versus the original expectations, CTN will be unable to meet the original goal of providing physical broadband subsidized service to 863 sites. Based on current CTN site bandwidth selections, we anticipate that we will encumber the full \$22.1 million award by serving roughly 300 RHCPP sites. CTN plans to fund 85% of the cost to provide broadband services to these sites through the RHCPP, with the remaining 15% match from the California Emerging Technology Fund (CETF). The California Teleconnect Fund (provided by the California Public Utilities Commission) provides an additional 7.5% credit on monthly recurring expenses for RHCPP sites.

The previously mentioned interconnection with the CENIC, CRIHB and IHS networks, along with plans to utilize encrypted video endpoint solutions and additional unsubsidized Fair Share connections to ineligible RHCPP health care providers will enable CTN to reach the original 863 site goal. CTN staff is now focusing efforts on enrolling eligible health care providers in the FCC Healthcare Connect Fund (HCF) and has already received over 300 HCF LOA's from eligible health care provider locations. CTN plans to utilize the 65% HCF subsidy to provide broadband services to eligible sites with the remaining 35% match to be paid by participating health care provider sites.

# Sources of Funding in Addition to RHCPP Award

**Membership Fees:** CTN began billing of membership fee dues in July, 2011 for sites connected as of July 1, 2011. As of August, 31 2013 CTN is billing 234 member sites. Participating RHCPP member sites are billed a monthly fee based on the size circuit ordered.

		CTN	N Bundle Pri	cing		
	1.5 Mbps	3.0 Mbps	4.5 Mbps	6.0 Mbps	10 Mbps	45 Mbps
Year 1	62.50	75	100	125	262	1000
Year 2	100	150	200	250	420	2000
Year 3	100	150	200	250	420	2000

For the twelve months ending June, 30, 2013, CTN recorded \$ 336,078 in membership fee revenue which is used to help sustain CTN core operations.

**HRSA Grant:** In September, 2012 CTN and the California Telehealth Resource Center (CTRC) received a four year \$1.4 million grant from the Health Resources and Services Administration (HRSA) to serve as the Regional Telehealth Resource Center for the State of California for the September, 2012 through August, 2016 period. Please see attachment #3 for a progress report from the CTRC through May 31, 2013.

**United Healthcare Grant:** CTN and the CTRC received grant funding in the amount \$2,000,000 from United Health Care to 1.) Continue operating the FCC RHCPP, 2.) Continue to advocate for broadband enabled health care delivery 3.) Launch the FCC HCF and 4.) Implement revenue generating strategic initiatives. The grant covers the July, 2013 through December, 2014 period.

**UC Davis/BTOP Grant Sub Award:** CTN and CTRC received a \$625,000 extension to the UC Davis Broadband Technologies Opportunities Program (BTOP) grant sub award. The sub award extends funding for CTN RHCPP personnel. These funds will also be used to fund telemedicine workshops for up to 25 sites. The grant covers the September, 2013 through March, 2014 period.

**Blue Shield of California Foundation Grant:** California Telehealth Network (CTN) was awarded \$200,000 from the Blue Shield of California Foundation to improve coordination of health care among care providers by integrating primary care, behavioral health care and health information exchange services in San Bernardino County. During the grant period of January, 2013 through December 2013, the team will achieve the following goals:

- a. Improve the level of integration between behavioral health and primary care facilities:
- b. Provide site assessments for telehealth readiness;
- c. Connect county primary care providers to CTN's secure, broadband network; and
- d. Connect eleven (11) health care systems to the region's Health Information Exchange to securely share information among county health care providers.

# 7. Identify any Technical or Non-technical Requirements or Procedures Necessary for Ineligible Entities to Connect to the Participant's Network

CTN continues to receive interest from various for-profit and other RHCPP ineligible health care facilities. Interested parties are offered the Share-of-Cost (Fair Share) Membership Agreement which excludes RHCPP funding. CTN reached agreement with the California Teleconnect Fund (CTF) to include the CTF state broadband subsidy in CTN fair share pricing to provide a more compelling offering.

# 8. Provide an update on the project leadership, management structure and plan

Current Leadership and Management Structure

There are no changes to project leadership and management since the last report. CTN President and CEO Eric Brown continues as the Project Coordinator. Director of Operations Denise Jurca continues as the Assistant Project Coordinator.

# Project Plan and Schedule

There are no significant changes from the last report. Through the physical connection point (peering point) between the CTN backbone and the statewide CENIC network, CTN participants are afforded direct access to virtually all educational and research institutions in California. In addition CENIC provides access to national research and educational networks (i.e., Internet 2 and National Lambda Rail), as well as access to the Public Internet for all CTN Sites. The following is an updated approximate schedule of events.

#### **Schedule of Events:**

Event	Date
Initiation of CTN Business Plan Vendor Contract Negotiations	Complete
CTN Business Plan Vendor Contract Signing	Complete
Initial Form 466A Submission	Complete
Completion of Second and Third 466A Submission	Complete
Collect signed Membership Agreements from CTN Participants	Ongoing
Technical Site Readiness Calls for First 50 Sites	Complete
Distribution of Site Readiness Questionnaires to Additional Sites	Ongoing
Legal Review of Share-of-Cost Membership Agreement	Complete
Begin Construction of CTN-CENIC Peering Infrastructure	Complete
Implementation of Internet Connectivity	Complete
Submission of Revised 466A Filing	Complete
Submission of 465 Filing for additional sites	Ongoing
Submission of 466A Service Substitution Filings for additional or	Ongoing
previously approved sites	
Orders placed with AT&T	Ongoing
USAC AT&T invoicing	Ongoing

### 9. Provide Detail on Whether Network is or Will Become Self-Sustaining

In October, 2012 the CTN Board of Directors approved a revised Strategic and Operating plan that can be found on the CTN web site at (www.caltelehealth.org.). The plan refines the CTN path to sustainability by prioritizing four strategic initiatives. CTN staff is currently in the process of developing and implementing these initiatives with the help of outside subject matter expert consultants. The objective of the CTN plan is to reduce CTN's dependence on grants for core operating expenses by leveraging revenues from value added services to health care providers in California. The plan prioritizes the following strategic initiatives with the goal of self funding CTN core operations by the end of 2014:

**Specialty Care Services Initiative:** To address CTN site demand for telemedicine specialty care services CTN is partnering with five telemedicine specialty care providers that were selected through a competitive RFP review process and fully vetted by CTN Board stakeholders. This RFP will be offered on a reoccurring basis to allow additional telemedicine specialty care providers to participate. CTN receives no revenue from the selected firms. These services are highlighted for CTN sites to encourage telemedicine utilization of the CTN network.

Patient Referral/Scheduling Tool: After a thorough RFP review process, CTN selected Eceptionist as the web based patient referral and scheduling platform that CTN clinics and specialists utilize to schedule in person and telemedicine specialty consults. The scheduling tool will enable clinics to more easily schedule a specialists time and will also assist CTN with improving our ability to accurately document telemedicine activity and CTN network utilization. CTN staff working with Eceptionists is in discussions with multiple California medical centers and hospitals to deploy Eceptionist at a reasonable cost that will also provide net contribution to help fund CTN core operations.

Managed Video Endpoint Initiative (CTN Connect): The managed video endpoint initiative provides health care providers with an affordable, web based, encrypted, interoperable video conferencing solution to conduct telehealth activities. CTN has learned on its many site visits that the legacy telemedicine carts and video conferencing equipment is often too costly and difficult to maintain for many of the smaller health care providers and clinics. In response to this, CTN engaged in a competitive selection process and chose the Vidyo web based video conferencing platform as the preferred solution. CTN branded the platform "CTN Connect" and has developed an online directory of all participating sites. CTN provided a free license to each of our existing RHCPP member sites and will offer additional licenses at a modest fee that also provides net contribution to support CTN sustainability. CTN Connect is also being marketed to non CTN member sites in an attempt to expand access to the network among health care providers that already have a broadband connection.

**Alternative Broadband Initiative:** CTN's alternative broadband (fair share) initiative will expand the list of CTN broadband providers beyond AT&T which is currently CTN's master vendor. CTN plans to use the additional broadband providers to serve Fair Share sites. These providers have also been invited to bid on the CTN HCF RFP. By expanding the list of available broadband providers, CTN anticipates a more competitive vendor selection process to reduce CTN's broadband costs and improve installation lead times.

#### 10. Provide Detail on How the Supported Network has Advanced Telemedicine Benefits

Many of CTN's connected sites are now conducting telemedicine consultations over the network. Rural sites such as Eastern Plumas Hospital in Portola, CA, Seneca Health District in Chester, CA, and the California Rural Indian Health Board (CRIHB) which serves roughly 20 tribal health organizations in California report that they would not have been able to initiate and sustain telemedicine services for their communities without the affordable, reliable broadband provided by CTN and the equipment and training made available through the UC Davis/BTOP grant Model Communities program. The sites continue to express great satisfaction with the quality of the video and dependability of the network. CTN's work with the UC Davis Health Systems on the eHealth Broadband Adoption grant, funded by the Department of Commerce's Broadband Technology Opportunities Program, established 15 broadband enabled "Model Communities" that received over \$5.0 million in telemedicine equipment and services.

Working in collaboration with UC Davis Health Systems, CTN helped develop and offer the eHealth Broadband Adoption Online Training Program with over 60 hours of online content which provides numerous lessons on the topics of telemedicine, telehealth, and other important broadband adoption topics. This training, available to all CTN sites provides learners with information on how to start and operate a telemedicine program, in addition to learning more about the CTN and other telehealth services. A link to the training site and a list of the selected Model Communities can be found at:

http://www.ucdmc.ucdavis.edu/cht/initiatives/BTOP/index.html.

Over the past year, CTN completed consolidation of the California Telemedicine Resource Center (CTRC) into CTN operations. This important collaboration has enabled CTN and CTRC staff to partner to expand telemedicine programmatic and technical assistance focused on safety net health care providers statewide. CTRC estimates over 250 health care providers have been made "telemedicine ready" over the past year, Through additional funding from United Healthcare, CTN and the CTRC are providing regional telemedicine implementation workshops that enable health care providers to receive direct training on telemedicine implementation.

# 11. Provide Detail on How the Supported Network has Complied with HHS Health IT Initiatives

- 1) Interoperability Standards: the network has been designed as an "open network", complying with industry-standard protocols.
- 2) CTN completed construction of an interconnection (peering point) with the CENIC statewide educational and research network in Los Angeles California. Through the peering point, CTN participants are now able to directly connect to all sites available on the two national research and educational networks: Internet2 and National LambdaRail.
- 3) CTN Board stakeholder, The University of California Davis Health System (UCDHS), is actively involved in bioterrorism and pandemic response activities. Several members of the UCDHS Center for Health and Technology (CHT) are actively involved in this work and have been advised to coordinate the CTN-related activities with Department of Health and Human Services (HHS) Secretary for Public Response.

- 4) UCDHS CHT will participate with CTN management to facilitate interoperability with public health and emergency organizations. CHT completed work through a \$5 million grant from HHS to develop Emergency Department Surge Capacity coordination. Part of this work involved developing collaborative and cooperative agreements among local, county and regional emergency response agencies and public health organizations. Efforts were made to coordinate the integration of additional sites for the HHS project in such a fashion that there was maximal overlap between HHS and CTN sites. The long-term goal is to position the CTN to become a core component of region and statewide efforts to develop emergency response and disaster preparedness programs and infrastructure. CHT and CTN management will expand the coordination efforts to include HHS and CDC interoperability requirements, as the network is actively deployed.
- 5) CTN is coordinating with the University of California Proposition 1D/PRIME rural outreach initiatives. This program is funded through a \$200 million bond initiative approved by the voters to enhance training of medical students who express interest in practicing in rural areas. A portion of the funds (\$10 million) is used to provide telemedicine equipment to rural health care sites, in order to facilitate telemedicine use. The equipment distribution initiative was suspended for a period of time during late 2009 due to significant state budgetary challenges, but has since resumed. To date, 10 sites have received telemedicine equipment and training, while the others are in various stages of the deployment process. More sites across California are participating in telehealth activities, including those with connectivity through the CTN.
- 6) CTN collaborated with the University of California, Davis Health System on an eHealth Broadband Adoption grant. This Department of Commerce, Broadband Technology Opportunities Program (BTOP) grant was developed to promote broadband adoption through technology enabled health care. Over \$14 million in federal and match funds combined was used to support three important components:
  - a. CTN operations;
  - b. Development of robust eHealth training curriculum that is accessible on-line to educate CTN members, health care providers and consumers on the use of broadband in various health care modalities and;
  - c. Operate 15 Model eHealth Communities that have received strategically placed eHealth equipment in a number of rural and other medically underserved California communities. Model Communities demonstrate a community-based transition model to technology-enabled health delivery.

# 12. Explain How the Selected Participants Coordinated in the Use of Their Health Care Networks

CTN will implement ongoing efforts to comply with HHS programs to provide access to network services during national, regional or local public health emergencies. CTN plans to facilitate access through three means:

- 1) CTN staff makes regular site visits to receive feedback from CTN member organizations on their experiences with the network. Over 150 site visits were completed during the last year. CTN member sites are continually encouraged to provide suggestions or constructive criticisms how CTN and CTRC can help support their telehealth initiatives.
- 2) CTN is connected to both National Lambda Rail and to Internet 2 national networks. Through these connections, HHS has unrestricted access to the CTN network, thereby providing integration at a national level.
- 3) CTN is connected to the Corporation for Education Network Initiatives in California (CENIC) which provides direct connectivity to California's academic medical centers
- 4) Over the past twelve months the CTN leadership team organized and participated in best practices collaboration meetings with six other RHCPP participating Western States (Colorado, New Mexico, Nevada, Oregon, Arizona and Utah). The group shared information on RHCPP deployment status, reviewed common areas of interest pertaining to the FCC Healthcare Connect Fund proceedings, and reviewed key sustainability initiatives. The group plans future meetings and has agreed to continue to collaborate on mutually beneficial sustainability tactics.
- 5) UCDHS received a \$5 million grant from HHS as part of their Emergency Department Surge program to develop effective health care coordination capabilities in the event of public health emergencies. UCDHS selected rural health care facilities that would coparticipate in both programs. CTN will develop and support coordination of geographically distributed health care resources on a regional basis based on the findings of the UCDHS Surge Capacity grant, as well as any current efforts in the area of disaster preparedness.

# CTRC Progress Report

# Progress Report September 1, 2012 through May 31, 2013

## Objective 1:

Provide ongoing educational, programmatic and technical information and support to clinical providers and telemedicine programs to assist in their development, implementation and sustainability efforts.

## **Progress:**

- 478 hours have been spent providing trainings and technical assistance to 350 sites, reaching 2,149 attendees.
- All training session attendees were given satisfaction surveys that rank on a scale of 1-5 their satisfaction
  with the content, delivery, knowledge of instructor, and quality of handout materials. Overall evaluation
  satisfaction rating is 4.7 which translates to a 94% satisfaction rating.
- Technical assistance evaluations began in May 2013 as we have recently contracted with an external evaluator. Results will be reported in the next 6 month reporting cycle.
- All technical assistance services and requests are currently being tracked via Survey Monkey and Excel Spreadsheet data entry. Reports are generated by request.
- The CTRC toll-free number usage is being tracked by referring to the telephone bill. 152 individuals utilized the 800 number between September 1, 2012 and April 24, 2013.
- Using Google Analytics, the CTRC tracks web site visit statistics for value and trending purposes. A snapshot of overall site visits for this reporting cycle is as follows:

Page	Total views	Total views	Unique	Return	International
	Sept 2011 –	Sept 2011 –	Views	Views	Views
	Feb 2012	May 28, 2012			
Landing Page	6,200	7,376	70%	30%	186 India
Training Videos	1,025	1,468	64%	36%	126 Australia
Telehealth FAQ	936	1,350	65%	35%	120 UK
Statewide Conference		1,036	73%	27%	61 Japan
Team	552	868	72%	28%	
Contact Us	517	830	75%	25%	

• In an attempt to identify regional needs and target areas for assistance, CTRC utilizes both board members as well as regional consultants from existing telehealth programs. CTRC progress, activity and future focus areas are discussed with CTN board members on a quarterly basis. Board members represent the following: California HealthCare Foundation; University of California Davis; Department of Managed Health Care; California Public Utilities Commission; Southern Sierra Telehealth Network; California Technology Agency; University of California San Diego; California State Rural Health Association; UnitedHealthcare; California Association of Health Plans; California Health and Human Services; California Emerging Technology Fund; University of California Office of the President; California Primary Care Association; and the California Hospital Association.

- All program development tools and guides are available for free public access on the CTRC website, caltrc.org. In addition, all sites visited and trained during this reporting period have been given program development tools and on-site consulting. Sites receiving technical assistance via telephone, video or webinar have been made aware of website resources, and have been sent either hard or electronic copies of resources upon request.
- As a result of funding from UnitedHealthcare, the CTRC was able to provide 51 training sessions to 51 unique sites, with 35 sites participating in more than one training session. Additional sites are waiting for scheduling, but have been placed on hold as funding for the training aspect of this project has been fully committed as of June 2013.

#### Objective 2:

Increase the awareness of telemedicine, telemedicine program development resources and changes in California regulations around telehealth.

#### **Progress:**

- CTRC Staff attended and/or exhibited at the following meetings during this evaluation period:
  - 1. Sept 2012 Attended and exhibited at American Telemedicine Association Fall Forum New Orleans LA
  - 2. Oct 2012 Attended and exhibited at American Public Health Association Meeting San Francisco CA
  - 3. Nov 2012 Attended and exhibited at California State Rural Health Association meeting Anaheim CA
  - 4. Jan 2013 Attended World Congress Telehealth Summit San Diego CA
  - 5. May 2013 Attended and exhibited at American Telemedicine Association Annual conference–Austin TX
- CTRC Staff delivered general session presentation and/or workshop presentation at the following events/conferences during this evaluation period:
  - 1. Nov 2012 Workshop Presentation- California State Rural Health Association meeting Anaheim CA
  - 2. Nov 2012 Presentation Southern Sierra Rural Health Network conference Via video due to weather
  - 3. Jan 2013 Workshop Presentation- World Congress Telehealth Summit San Diego CA
  - 4. Jan 2013 Presentation Medi-Cal Stakeholders meeting and educational event Sacramento CA
  - 5. Mar 2013 Presentation California Emerging Technologies Fund Annual Broadband Adoption Conference - Sacramento CA
  - 6. May 2013 Panel Presentation American Telemedicine Association Annual Conference Austin, TX
  - 7. May 2013 Panel Presentation Broadband Illinois Telemedicine Summit St. Louis Missouri
- Web Based Knowledge Portal Update and Maintenance: In September 2012, overall messaging updates have been made to the website. Content that previously required a fee to access was moved to free access (Developer Kit and Video Training Series). An advisory group meeting was held in December 2012 to determine overall usefulness of content and a plan was developed to update and replace outdated content on an as-completed basis.
- Telehealth certification courses are promoted in every on-site presentation and training session, as well as on the web site. CTRC granted ten course scholarships to clinics during this report period.

A social media program has been established during this reporting cycle. The CTRC created Twitter and Facebook accounts. Facebook followers have increased from zero to 16 and Twitter followers increased from zero to 32. We placed 8 videos onto Youtube, and as a result increased views from zero to 389.

#### **Objective 3:**

Develop Regional Implementation Groups to bring developing sites together to discuss barriers to program development and best practices.

## **Progress:**

The start date for work on this objective has been pushed from October 2012 to June 2013 due to CTRC involvement in joint projects that logically were placed ahead of the regional group formation. CTRC partnered with UC Davis Model eHealth Community project in order to perform telehealth site assessment and education visits to 110 model eHealth Community sites throughout the state from June 2012 through February 2013. These site visits were necessary as a first step in developing the implementation groups as information gathered from meeting with these sites will inform the formation of the implementation groups. In addition to the UC Davis partnership, CTRC is also partnering with UC Irvine to assist with the education and on-site training of 50 new safety net clinic sites who are receiving new telemedicine equipment. Regional group training sessions were conducted in person and via webinar as part of the UCD Model eHealth Community project and the California Telehealth Network's goal of providing telehealth implementation training for 75 sites between September 2012 and August 2013. Basic implementation training (covering equipment usage, patient presentation technique, basic telehealth clinic functions, workflow and billing) must be conducted prior to the establishment of workgroups.

The first implementation workgroup is currently being scheduled to occur in August 2013 for a county consortium of 35 clinics in the San Bernardino CA area.

The 2<sup>nd</sup> through the 4<sup>th</sup> Regional Implementation Groups have been identified as follows:

- Group 2: California Rural Indian Health Board (CRIHB). This group, while not located in a specific geographic region other than California, will be treated as a separate region due to the cultural and organizational similarities of the clinics.
- Group 3: Alameda County Collaborative. This group is in Alameda County, and includes a juvenile detention center, a children's hospital, a university medical center and several primary care clinics in Alameda County.
- Group 4: San Francisco Community Consortium. This group is in the city of San Francisco, and includes church based clinics and homeless shelter clinics, women's clinics, a county general hospital, and several FQHC primary care clinics.

## **Objective 4:**

Coordinate and host annual telehealth coordinator workshops and one statewide conference on telehealth.

#### **Progress:**

- The annual telehealth coordinator workshop entitled "Telehealth Marketing: The Fast-Track to Patients and Progress for Your Telehealth Service" was conducted on April 14, 2013.
  - Registered attendees: 122. Number of participating attendees: 86. Scope of work requirement: 30 attendees
  - Evaluation Summary: Of the 86 attendees, 66 course evaluations were completed. The overall course evaluation based on content, relevance, materials, and delivery was 4.4 on a scale of 1-5, which is an 88% satisfaction rate.

The telehealth conference obligation is in Year 3 only of the scope of work. However, it is significant to note a decision was made to offer a statewide conference this year due to the large number of new telehealth sites statewide (115 new sites from UCD Model eHealth Communities, and over 100 new sites from University of California equipment distribution projects). Planning and work performed in preparation for and completion of this conference took place in this reporting cycle.

The 2013 CTRC Statewide Telehealth Summit, "Moving California Forward" occurred April 15-16 2013.

- o Registered attendees: 292. Number of participating attendees: 278. Scope of work requirement for year 1: 0.
- Evaluation Summary:
  - Day 1: 109 evaluations completed with an average course rating of 90%
  - Day 2: 89 evaluations completed with an average course rating of 91%

# Objective 5:

Create financial modeling for telehealth sustainability at FQHCs, specialty clinics and primary care clinics.

## **Progress:**

A financial sustainability model for the purchase of specialty services has been created for both the specialty and primary care clinic sites, and shared with each clinic visited as well as those requesting assistance via telephone, email and web request form. It was the decision of the group that we would postpone our work with a formal financial analyst for full analysis, report and tool-kit preparation until the state and clinics have a better understanding of health reform changes that will be taking place in 2014. Also, we are working with several payers, including Medi-Cal and CCS regarding their telehealth reimbursement policies which will change significantly in August 2013. Producing a formal telehealth sustainability model based on today's reimbursement and health coverage policies will be premature and wasteful of monetary resources.
